**RE: Request to Submit the Haystack Mine's Demonstration of Exceptional Event Package for
November 1, 2017 to the EPA**

Kristina:

This letter is to request the Air Quality Division to submit the Haystack Mine's demonstration of exceptional event package to the EPA. The event occurred on November 1, 2017. The package clearly demonstrates that the exceedance was due to offsite impacts and high winds. The Haystack Coal Company appreciates the AQD's assistance with this exceptional event demonstration.

Should you have any questions, please contact Colton Sandall at the number or email below the signature line.
